

# Goat Starter/Grower

## Profile

Hubbard® Life 18% Goat Starter/Grower is a palatable, nutrient dense goat starter/grower formulated specifically to be fed to one-week to sixteen-week-old kids. Hubbard Life Goat Starter/Grower contains ammonium chloride to help reduce instances of urinary calculi (water belly).

## About the Products

**Palatability** is of the utmost importance in getting kids to start eating and to consistently consume feed. Hubbard Life Goat Starter/Grower is formulated with high quality, palatable ingredients to promote feed intake.

**Ammonium Chloride** helps prevent urinary calculi (water belly). Hubbard Life Goat Starter/Grower provides ammonium chloride and provide the proper calcium to phosphorus ratio to further help reduce instances of urinary calculi.

**Pelleted Feeds:** Pelleting prevents the separation of the various ingredients. Each bite of feed is the same, high quality feed. Some products may also be available in a texturized (sweet feed) form.

**Added Yeast:** Research has suggested that the addition of yeast in the diet will create an environment in the rumen that allows the “bugs” to work more efficiently for better fiber (hay and pasture) utilization.

**Part of a Complete Feeding Program:** Designed for the specific growth and performance stages of an animal. Specific emphasis is placed on maximum muscle growth in the meat breeds. Optimal tissue (udder, GI tract, bone) development is the goal in developing excellent milking replacements. Supplying proper nutrition for prime milk production is the objective for milking does.

**Drug Options:** All approved drug options are added to Hubbard Life Goat Feeds. Floor stocked medicated feeds will vary by location depending upon requests. Drug options of Deccox<sup>®</sup> and Rumensin<sup>®</sup> are available for cocci control and growth promotion.

**Mineral Fortification:** Special care is given to ensure that the levels of trace minerals, including zinc are added to the feeds. In addition, new technologies have produced more readily absorbed minerals called proteinated minerals including an organic selenium product on the market, Sel-Plex<sup>®</sup>. These minerals have been incorporated into all the Hubbard Life Goat Feeds.

**Vitamin Fortification:** In addition to the proper levels of vitamins A, D and E, the B-complex vitamins have been added to help production and performance shine in the face of stressors like fast growth, heavy milking, heat and transporting.

## Nutrient Analysis

Crude Protein*, min %	18.0
Crude Fat, min %	3.5
Crude Fiber, max %	14.0
Calcium (Ca), min %	0.8
Calcium (Ca), max %	1.3
Phosphorus (P), min %	0.6
Salt (NaCl), min %	0.9
Salt (NaCl), max %	1.4
Copper (Cu), min	15 ppm
Copper, (Cu), max	65 ppm
Selenium (Se), min	0.30 ppm
Vitamin A, min	10,000 IU/lb.
Vitamin D, min	2,000 IU/lb.
Vitamine E, min	75 IU/lb.

\*This includes not more than 1.1% equivalent protein from non-protein nitrogen (NPN).
