

Grain Marketing

Harvest is done and now we need to look forward to marketing the remainder of the 2017 crop and thinking about locking in the 2018 crop, Opportunities will come as we move forward this winter and spring, the key will be to take advantage when they come. We had the chance to lock in \$3.40 cash corn for new crop 2017 at least 4 times last year, we did get some contracted, but not enough, lets try to do a better job this year. I can put in open orders for beans and corn for the old crop and next years crop just let me know what your target price is. It is very slow at the office now, I would look forward to meeting with you to getting your thoughts or call me and I will make a road trip. Thank You Duane Schecher
